GISAN RAHMAN

FRONT-END DEVELOPER

SUMMARY

I am a dynamic front-end developer, leverages cutting-edge HTML, CSS, and JavaScript skills to architect visually stunning and highly interactive user interfaces. I collaborate seamlessly with cross-functional teams, integrating innovative design concepts to drive web development projects forward. Committed to advancing my skills, my destination is to lead transformative projects that redefine digital interactions and push the boundaries of front-end excellence.

MY PROJECTS

Blueharb

Asset Management System Website (mern-stack)

Below are some features :

- You can keep track of your assets without any worries.
- If an employee needs something outside of your resource list, it's easy to let you know.
- You can become an admin by purchasing any of the 3 types of packages at a low cost.

Technology used: React, Tailwind, Daisy UI, Axios, Tanstack Query, Mongoose and Node.JS.
